EXTRA DIRT RESISTANT – FOR BAGGED GOODS.

The SECUNORM 610 XDR is a real innovation. Use it to effortlessly open bags of any type and thickness. "XDR" stands for "extra dirt resistant". Whether bag contents are dusty, gritty or sticky, the SECUNORM 610 XDR continues to cut without losing performance.

Bag opener with automatic blade retraction – metal detectable

TRAPEZOID BLADE
NO. 160099
(stainless)

OPEN DESIGN

The open design of the SECUNORM 610 XDR has several advantages: dust and other particles won't stick and moveable parts stay moveable. Lever and blade retraction then continue to function even under the most difficult conditions.

CLEANABLE, STAINLESS, METAL DETECTABLE

Even extra tough dirt is no problem! Lever and handle can be folded out to enable you to clean the inside, e.g., using compressed air, water or acetone. All parts are also stainless and metal detectable.

NEW PRODUCT FAMILY

The SECUNORM 610 XDR's exceptional features make it the ideal founder for our new MARTOR product family: XDR (= extra dirt resistant). Products bearing this abbreviation perform as safe and efficient cutting tools, even in demanding environments.

EXTRA SAFE – FOR PAPER ROLLS.

A MARTOR tool without a blade? Voilà! The SECUPLUS RIPPEX is available in versions 220 and 210. Both use their top edge to tear off tensioned paper. You determine how many layers you want to remove by precision piercing into the roll.

SECUPLUS RIPPEX 220

NO. 220001

NEW

Bladeless paper splitter –
also for multiple layers

NEW

Bladeless paper splitter –
for single layers

Curved
knife nose

EXTRA SUSTAINABLE – FOR EVERY DAY.

The SECUNORM MIZAR is the newest member in our ECO by MARTOR range. The all-rounder's handle has now also been converted to recycled plastic. Other safety knives will follow soon. MARTOR is clearly becoming increasingly sustainable.

EXTRA SPACIOUS – FOR YOUR EQUIPMENT.

If our BELT HOLSTER XXL were a suitcase, you would be able to pack it for a long journey. It has space for everything – and is instantly accessible: several MARTOR cutting tools in the outer compartment, plus smartphone, spare blades, a folding rule, pens, etc., in the sealable inner compartment.

Clip

EXTRA FLEXIBLE – FOR YOUR CUTTING TOOL.

What do BELT HOLSTER XXL and TOOL RETRACTOR have in common? Both free up your hands when not using your safety knife. Almost any MARTOR cutting tool with an eyelet can be connected to the TOOL RETRACTOR. When you release the tool, the cord retracts by itself.

TOOL RETRACTOR
